

PIB 34 Applications and Requirements for Approved Radio Engineers and Approved Radio Certifiers

The Ministry of Economic Development has a policy enabling licence applicants to choose who will perform the engineering and certification of licences.

Assessing the technical compatibility of a licence with existing licences can be undertaken either by Ministry engineers or by external engineers approved by the Ministry.

There are two categories of external engineers:

- Approved Radio Engineer (ARE) can certify both spectrum and radio licences.
- Approved Radio Certifiers (ARC) can only certify radio licences.

If you would like to become an ARE or ARC, or you wish to find out about the requirements the Ministry has for ARE and ARC, you will find this in the current issue:
