Radio Spectrum Policy topics which are no longer current can be found in the archive section. These documents may no longer be updated or contain the most current information but are still provided for your reference.

[Replanning 400 MHz \(ARCHIVED\)](#)

Publication of the Engineering Consideration Document ECD2000/2, on Replanning the Radio Spectrum 400-499 MHz.

[Competition safeguards \(ARCHIVED\)](#)

As part of its ongoing work programme, earlier this year the Ministry commissioned a report from Australian firm, in particular, the Ministry was interested in overseas experience. Please note that the views expressed in the report are those of the authors' and the report is presented not as policy but with a view to inform and stimulate.

[Review of the pilot general user radio licence for fixed radio links \(ARCHIVED\)](#)

The General User Radio Licence (GURL) for Fixed Radio Links (FRL) was introduced in June 2003. This allowed for fixed point to point links to operate in the 5725 to 5825 MHz band with up to 200 watts radiated power. Because GURL's have not generally been issued for such high power devices, the pilot was initially issued for a trial period with an expiry date of 30 June 2004. A review was undertaken to assess the future of this licence.
