

806-960 MHz band replanning

A review of the non-cellular usage of the 806-960 MHz band of radio spectrum has been summarised in a discussion document that proposes changes to some spectrum allocations in the band.

[806-960 MHz band replanning options - a discussion paper](#)

This discussion document reviews the efficiency of spectrum allocations in the 806-960 MHz band, principally for non-cellular applications, and considers options for replanning these allocations to achieve greater efficiency.

[Interference analyses](#)

Analysis of the potential interference between services across different boundaries has been undertaken in order to assess the technical feasibility of the changes proposed in the discussion paper.

[Workshops](#)

The Ministry held workshops in Auckland and Wellington on 8 and 11 June 2009 to discuss the 806-960 MHz band replanning proposals and options.

[Submissions](#)

Submissions received by the Ministry on the 806-960 MHz band replanning options discussion paper.

[Media release](#)

Communications and Information Technology Minister Steven Joyce has released a discussion paper seeking input into a proposed reallocation of radio spectrum in the 806-960 MHz band.
