## [Disclaimer](#)

### [1. The radio licence regime](#)

The Radiocommunications Act 1989 (the Act) establishes two separate regimes for management of the radio frequency spectrum in New Zealand.

### [2. The issues](#)

Issues of investments in infrastructure and security of tenure.

### [3. Options for change](#)

The remainder of this discussion paper discusses possible options for the radio licence regime to offer greater security of tenure in isolation of any other changes to the regime. It does not consider other possible reforms.

### [4. Request for comments](#)

Comments on the proposals contained in this paper and on any related issues, are invited from interested parties (see Appendix 1).

### [5. Appendix 1: Submissions](#)

Submissions are to be made in the following format.
