

Review of Radio Spectrum Licence Fees.

~~~~~

Proposal 1. Fees should be structured on actual occupied frequency bandwidth,  
and Transmitter power .  
Licence Fee cost should be based on usage of Bandwidth.  
eg, incentive to conserve  
frequency usage.

Proposal 2. Single Licence Fee may not be practical as some Services are low cost  
operation. eg. Simplex, PRS, low  
power Repeater, Amateur Radio.

Proposal 3. Agree

Proposal 4. Agree

Proposal 5. Agree

Proposal 6. Currently Low Power Repeater Licence ( LR3 )  
under 7dBw is more  
expensive than Higher Power .( LR4  
)

Same example applies to Television Broadcasting ( BU1 ) under 10 dBw  
is more expensive than a  
40 dBw Licence.

Trust the above is of some value for discussion / feedback.
