Subject: Radio Spectrum Band III Consultation
Date: Thursday, 5 May 2016 7:45:20 a.m.

Please would you retain the use of analogue Radio Microphones in this band.
I have three radio mics in the 200 MHz range, and they are the best radio mics I have. Their range is considerably better than the UHF ones. This ability often gets me out of trouble at A and P shows where the organisers expect much more range than the 20m expected at West End stage shows!

In some A and P Shows or other equestrian events, the commentator grabs the microphone and literally disappears over the horizon out of site, and still expects the mic to work....
