

Good morning

I have only learned of this proposal this morning, and submissions close today.

I wish to have it recorded that I strenuously oppose this proposal as an owner and operator of an AM frequency. The frequency is very important as part of our MOU with MCDEM to reach remote river valleys in the Bay of Plenty that FM can't reach.

My primary objection relates to the increased interference that will be caused to our signal should this proposal be enacted.

Yours faithfully,
Glenn Smith
