### General questions

#### Questions for organisations and businesses

<b>1</b>	Radio Dealer
<b>2</b>	Approximately how many licences do you or your organisation hold? 40
<b>3</b>	Before considering changes to fees, are you planning to increase or decrease the number of licences you or your organisation hold over the next five years? If yes, please indicate the expected proportion of this change. Yes – 5 to 10
<b>4</b>	What proportion of your licences do you expect will need to be modified in the next five years? 5%

### Questions about the proposals in the discussion document

#### Options for annual licence fee changes

<b>1</b>	What do you see as the advantages and disadvantages of option one? This method pretty straight forward.
<b>2</b>	What do you see as the advantages and disadvantages of option two? This method seems overly complex in its execution, I believe it would also provide entry barriers for our customers wishing to obtain spectrum licences leading to non-compliance.

3 Which option do you prefer? Why?

Option one. This option is less complex. I believe it also provides less of an entry barrier for adding additional licences. Option 2 may also lead to avoidance of notifying changes to licences as to do so would incur a substantial fee.

4 Is there any other option that has not been considered in this document? If yes, please explain this option in detail, including why it is preferable to option one and two.

5 What impact will the fee increase have on your business or entity?

Like with all cost increases, we will scrutinise the cost/benefits of obtaining and/or keeping existing licences.

6 How would fee option two impact the licensing decisions of your organisation or entity over the next five years?

As per Question 5. Either slower or a decrease in licences being required.
