[Changes to the Maritime Mobile Repeater allocations](#)

The last ITU World Radio Conference made changes to the International Radio Regulations in regards to the allocation of VHF frequencies for maritime use. These changes, will provide more radio spectrum for AIS and VDES signals. Go to [retune.co.nz](#) for further details.

[Read more about Changes to the Maritime Mobile Repeater allocations](#)

[Digital terrestrial television licences](#)

Cabinet has decided that the lower part of the digital terrestrial television band (510-606 MHz) can return to normal licencing arrangements. A moratorium on licence changes had been in place during the digital switch-over.

[Greater use of TDD equipment is now allowed in 3.5 GHz band](#)

RSM has announced decisions relating to the use of TDD equipment in 3.5 GHz band.

[Read more about Greater use of TDD equipment is now allowed in 3.5 GHz band](#)

[Fixed service review](#)

In early 2015 Radio Spectrum Management sought feedback on the use of fixed service bands in New Zealand.

[Read more about Fixed service review](#)

[Amendments to the Radiocommunications Regulations 2001](#)

The Radiocommunications Regulations have been amended to improve RSM's ability to deal with interference, and the import of prohibited and non-compliant equipment. The amendments came into force on 1 February 2015.

[Read more about Amendments to the Radiocommunications Regulations 2001](#)

[The Television Digital Switchover and the Digital Dividend](#)

Information about the digital dividend planning and consultation processes from 2005-2014.

[Read more about The Television Digital Switchover and the Digital Dividend](#)

[Managed Spectrum Park - Technical parameters consultation](#)

This technical consultation is being conducted to define technical parameters for certifying spectrum licences in the Managed Spectrum Park (MSP). We are now seeking feedback from AREs and interested parties on the recommendations as outlined in the report.

[Read more about Managed Spectrum Park - Technical parameters consultation](#)

[Television white space licensing rules](#)

Radio Spectrum Management has developed rules to allow the use of television white space devices.
